

Awaken new perspectives on the most ancient of secrets already in you

Ancient Mysteries Spring Egypt Tour

May 3rd - 15th 2011

Jason Martell has been one of the leading researchers and lecturers specializing in ancient civilization technologies over 15 years. Most recently, Mr. Martell garnered worldwide attention by recreating a working model of one of science's most prolific mysteries – the "Baghdad Battery." Lecturing throughout the world, he has dedicated his studies to Sumerian & Anunnaki culture and ancient artifacts by using the latest in scientific research, supporting evidence and data. Today, Jason is working in his next scientific recreation of ancient technology based upon data obtained from Sumerian cuneiform cylinder seals from 3000 BCE. He is in the planning stages of several ground breaking international research expeditions, and hopes to usher in a new era in the Ancient Astronaut theory.

Dr. Leir has been said to be one of the worlds most important leaders in physical evidence research involving the field of Ufology. He and his surgical team have performed sixteen surgeries on alleged alien abductees. This resulted in the removal of fifteen separate and distinct objects suspected of being alien implants. These objects have been scientifically investigated by some of the most prestigious laboratories in the world. Dr. Leir anticipates performing more surgeries, as he investigates the biological aspects of the abduction phenomenon. Stay tuned for the scientific proof of these findings they are literally out of this world.

WHEN WAS THE LAST TIME YOU DID SOMETHING FOR THE FIRST TIME?
